

ISSUE: 1 MARCH

Year 3
MonthlyMarch 30th

IN THIS ISSUE

March Highlights

Social Studies:

"We learnt about the earth. We learnt that there are seven continents and five oceans. We also studied what it is a compass rose, the equator line and the prime meridian". Priyanshi

Math:

"We studied place value. I learnt that it is to separate numbers into ones, tens and hundreds. We broke numbers and we also did math problems and subitizing". Vicente

English:

"In English, we are working on descriptive writing. We did an activity where we had to describe Oobleck. First, my teacher showed me the Oobleck and we used all our senses. After that, we brainstormed our ideas. Finally, we wrote a description". Abel

Science:

"We studied about the human body and the muscles. The muscles work with our tendons. The tendons pull so that we can move. There are three types of muscles: Skeletal, Smooth and Cardiac muscles which can be voluntary or involuntary. The voluntary is located in the skeletal muscles because they move when we want them to move. The involuntary are: the smooth and the cardiac because they move but we are not always aware. We have over 600 muscles". Bernardo
