Year 2

Classroom News

What have we been learning in April?

English

In English we have worked on developing our reading comprehension skills. In writing, we have been paying attention to the layout of a page (title, date, etc.).

Science

In Science we have been learning about healthy eating habits. We have also been learning about the five senses by exploring the world around us.

Math

In Math we have been developing our number sense by using concrete material and visuals. We have started to add numbers and identify odd and even numbers.

Social Studies

In Social Studies we have been learning about the different countries and nationalities. We have so many different nationalities in our class!
