

Year 6 Classroom News

April 30, 2019

Keep calm
and hoot
on

April highlights

English:

April started with exploring biographies of famous personalities in different fields, which helped us understand the difference between facts and opinions. We also learned to write newspaper reports using the features of the text type.

Math:

We learned to interpret and read solutions to problems involving length, weight and capacity. We also practiced how to use the measuring scales and convert units within the metric system

Science:

As a continuation of learning body organs and its functions, we focused particularly on the kidney and brain. We analyzed the diseases related to the organs as well as the cure and prevention of such diseases.

Social Studies:

We continued exploring more about natural disasters. We had lots of fun making the models of these disasters and presenting them to our peers.
