

**Livro: Energy efficiency: principles and fundamentals**

Foreword

Preface

Acknowledgments

Part One: Create an energy efficiency culture

Build the business case for energy efficiency

Understand the energy efficiency life cycle

Influence policy to support energy efficiency investment

Part Two: Deliver energy efficiency to consumers

Market barriers and assessment

Residential energy efficiency

Commercial and industrial energy efficiency

Demand response

Distributed generation

Part Three: Optimize energy efficiency performance

Participate in organizations that advance energy efficiency

Evaluate programs

Position for the future
