Extreme Rainfall Induced Landslides

an International Perspective

National Science and Technology Institute
for Hillslope and Plain System Rehabilitation

International Workshop on Extreme
Rainfall Induced Landslides

Supported by

National Council for Scientific and
Technological Development

Summary

SECTION I

Rainfall inputs: climatic variability, critical events & modelling

Operational Capabilities of the Brazilian Centre for Monitoring and Alerts of Natural Disasters.....	13
<i>Ian Marins Seixas, Carlos Frederico de Angelis, Agostinho Tadashi Ogura and Lorena Avelina Rojas Gutierrez</i>	
Variability and Changes in Rainfall Extremes in Southeastern South America: Observational and Projected Trends and Potential Social Impacts	25
<i>Jose Antonio Marengo</i>	

SECTION II

Conditions and mechanisms for shallow landslides and debris flows

Landslide in Unsaturated Conditions Caused by Rainfall Infiltration.....	39
<i>Marcos Massao Futai</i>	
The Swiss Risk Concept and Modeling Shallow Landslides with SliDisp+	70
<i>Daniel Tobler</i>	
Debris Flows and Debris Avalanches: Motion Analysis	86
<i>Oldrich Hungr</i>	
Debris and Mudflow Initiation Processes in Brazilian Tropical and Subtropical Humid and Mountainous Environments.....	103
<i>Dimitry Znamensky</i>	
A Suggested Shallow Slide Mechanism of Accidents in the Região Serrana of the State of Rio de Janeiro.....	128
<i>Willy Alvarenga Lacerda</i>	
Lessons Learned from Extreme Rainfall-Induced Landslides in South Korea.....	141
<i>Su-Gon Lee</i>	

SECTION III

Natural hazards and risks

Extreme Rainfall-Triggered Landslides: Hydro-Geomorphic Impacts and Induced Risks in the Nepal Himalayas	161
<i>Monique Fort</i>	
Assessment and Mitigation of Landslide Risk	182
<i>Farrokh Nadim and Suzanne Lacasse</i>	
Landslide Risk Management: From Theory to Practice.....	207
<i>Leonardo Cascini</i>	
Talus Landslide Hazard Assessment for a Strech of TAV Based on Scars Inventory Using High Resolution ADS80 Aerial Images And GIS	239
<i>Noris Costa Diniz and Fausto Batista Mendonça</i>	
Landslides Susceptibility and Risk Zoning at Angra dos Reis, Rio de Janeiro State, Southeast-Brazil: a Quali-quantitative Approach at 1: 5000 Scale	263
<i>Ana Luiza Coelho Netto, André de Souza Avelar, Anderson Mululo Sato, Manoel do Couto Fernandes, Rogério Ribeiro de Oliveira, Rodrigo Vinagre, Leonardo Barbosa, Pedro Henrique Lima and Willy Alvarenga Lacerda</i>	

SECTION IV

Risk management, mitigation and rehabilitation

Landslide Risk Management in Medellín, Colombia.....	297
<i>Hernán Eduardo Martínez Carvajal, Paola Andrea Isaza Restrepo and George Fernandes Azevedo</i>	
Structural Mitigation Measures Against Debris Flows in the Mountain Region of Vargas, Venezuela.....	325
<i>José Luis López and François Courtel</i>	
Fast Shallow Precipitation-Induced Landslides: An Increasing Threat for Society and Challenge for Geoscientists	343
<i>Luciano Picarelli and Emilia Damiano</i>	
The Assessment of the Risk Caused by Rainfall Triggered Landslides: Recent Achievements and Challenges	379
<i>Jordi Corominas</i>
