

YEAR 5 CLASSROOM NEWS

AUGUST HIGHLIGHTS

YOU ARE
LLAMAZING

ENGLISH

In English we learned more about the text features of a recount. We analyzed one piece of writing and identified the title, the purpose of each paragraph and how the conclusion was written to carefully wrap up the main ideas expressed by the author in the previous paragraphs. Our major highlight was our project called "A Day in the Life of a Bug". These stories will soon be available for you to read at home!

MATH

This month was all about learning how to interpret, collect and show data. We looked at different types of graphs including bar graphs, pie charts and line plots.

Can you look at the pie chart and tell me what is the **least** popular method used to travel to school?

Methods of Travelling to School

- Walking
- Car
- Bus
- Cycle
- Train
- Taxi

SCIENCE

In Science we decided to continue furthering our knowledge on plants. We analyzed which flowers are pollinated by the wind and which were pollinated by animals. We also took a closer look at the process of fertilization and the methods of seed dispersal (wind, animals, drop and roll, water and explosion). Watch this footage of exploding plants! https://www.youtube.com/watch?v=OB0P3mx_lxY

SOCIAL STUDIES

In Social studies we reviewed the key aspects of the different civilizations we have studied. As we celebrate "Fiestas Patrias" in September, we are now learning more about Chilean traditions and geography.

UP NEXT MONTH

SCIENCE & SOCIAL STUDIES

- *EARTH'S MOVEMENT
- *CHILEAN NATIONAL CELEBRATIONS

MATH

- *MULTIPLICATION AND INTRODUCTION TO DIVISION

ENGLISH

*NARRATIVE POETRY
