

Year 1 Classroom News

STAND OUT
FROM THE CROWD

September Highlights

English We have enjoyed hunting for rhyming words in stories and poems. It was interesting to find that some rhyming words have the same letters at the end but some do not.

Math It is fun locating numbers to 75 on our 100 charts. We enjoyed finding more than and less than given numbers as well as placing numbers in order from biggest to smallest and from smallest to biggest. We found that some shapes and numbers are symmetrical.

Science We have looked at and felt different types of materials found inside and outside the classroom. We took turns to place some of these items into a container of water. We saw which of the materials floated at the top and which sunk to the bottom. After that we grouped the materials that floated and those that sunk to see what was the same and what was different about the materials in the two groups.

Social Studies It was amazing to go on a school visit to the Fire Station. We learned so much about the equipment that the Firemen use to put out fires. It was so comforting to learn that there are always Firemen on duty just in case of an emergency. It was fun learning a traditional Chilean dance and participating in the Fiestas Patria's celebration.

UP NEXT MONTH

SCIENCE & SOCIAL STUDIES

- Materials continued
- Solids, liquids and gases
- More events in history
- New and old continued

ENGLISH

- Magic 'e', y behaving like a vowel and the 'igh' sound
- Writing interesting sentences
- Show and tell
- Reading books
- Sight words

MATH

- Increasing number range to 85
- Grouping and sharing
- Measuring
- Problem solving
