

PLAYGROUP
AND
FOUNDATION

SEPTEMBER HIGHLIGHTS

LITERACY:

In September, we learned about letters w, x and y. We made weather charts and whales, xylophones and x-rays, yo-yo's and yellow crafts. We practiced writing the letters and identifying them in words. We started our unit on Spring and ended our transportation unit with a visit to the fire station... which we loved! Playgroup and Foundation have been learning many new vocabulary words for our different letters of the week. We are now practicing writing our last names and the names of our classmates and school friends.

MATH:

This month in math we focused on numbers 1, 2, and 3. We worked hard at writing the numbers. I am thoroughly impressed with how well the students are able to complete a number line and write numbers 1 to 10 on their own. We even made our own number lines to take home so we can continue practicing and showing our skills.

SCIENCE / CRAFTS:

This month we worked on many Chilean inspired crafts to decorate our room for the Fiestas Patrias celebration. We made copihues and learned about how they grow. We decorated the Chilean flag and filled the classroom with red, white and blue to celebrate Chile. As for science, we have been watching seeds grow and looking at the inside parts of flowers to celebrate spring and new blossoms! Our favorite experiment was exploring gravity with balloons.
